

Egypt Mobile Code Changed

Sunday, 23 October 2011 11:33 -

Hello Valued Customer;

The Egypt government changed the mobile codes to Egypt. When customers call a number to any Egypt mobile they will hear a recording that the dial codes have changed. If the customer stays on the line then the call will be forwarded to the new phone number. This recording will be in effect for the next 4 months.

Number migrations are as follows:

Old range	New range	Service	Example
+20 10 xxxxxxxx	+20 100 xxxxxxxx	Vodafone	20 10 444444 is now 20
