\*\* Current user simply need to accept the upgrade prompt when they open the dialer. New users will need to download for the first time.

Download and try it today - [www.kwickconnect.com](http://www.kwickconnect.com) or [www.mobefree.com](http://www.mobefree.com)

### **3. Caller ID for resellers, soft switches, IPBX, agents and accounts**

With Pamir Telecom, you can customize the caller ID to meet your needs. Here are a few examples of how caller ID can be used:

- Resellers can set a custom caller ID for each accounts they sell
- Soft Switches can set the caller ID localized to their country as their own provider ID
- Every account can set their own caller ID so any access technique can hold their own mobile phone number so when customers call friends and family, they will a caller ID they recognize
- And much, much more....

#### **How it works?**

1. Your reseller panel must be enabled for Caller ID. Please see LIVE CHAT technical support or your sales manager to enable caller ID in your reseller panel.

2. Follow the step by step manual in your HELP tab and search 'caller id' or see this link - [http://docs.overvoip.net/doku.php?id=caller\\_id](http://docs.overvoip.net/doku.php?id=caller_id)

Thank you and best regards,

Customer Support & Eng Team.
