

With our Internet via satellite services you have a permanent 2-way connection to the Internet that will **save many hours delay in logging-on, downloading large files, surfing the web, downloading E-mail and waiting for your connection to respond** . Because your connection is permanent, E-mail will arrive straight in your inbox and you will never get a 'busy signal' when trying to connect.

All you need is a discrete box and a small satellite dish connected to your computer or network. Details of the particular equipment for each service can be found below. Our packages all bill according to grade of service. Our technical team will arrange installation and provide all the support you need, and that is all there is to it.

We offer our customers a choice of **3 different VSAT hardware types from the 3 largest manufactures in the industry** . We tailor the equipment to meet the needs of a client and In doing so give you the better service and value for money. Below are the hardware types available from PAMIR WEBS with package details.
