

Emerging technology trends, evolving business needs and new ICT sourcing options make it increasingly challenging to keep your ICT environment optimised, while delivering new services to the business faster. Today's IT leaders need to support current business operations while also charting a sensible path to be more agile, more efficient, more secure and more mobile. Selecting the right service provider that can partner with you to plan and build innovative solutions and optimise your IT environment has never been so important.

PAMIR WEBS's ICT consulting and professional services can add value to your business by providing strategy, architecture, implementation and integration services to help plan, build, improve and innovate your IT and business solutions. We provide these services across a range of technologies and delivery models including mobility, cloud, IT outsourcing, network, communications, data centre, end-user computing, security, and sustainability.

Our professionals around the world advise you on optimal ways to use technology and services to transform your ICT environment and achieve higher levels of innovation. We help you develop a strategic roadmap that aligns your IT strategy and investments to your business priorities. We also assist in developing specific strategies for mobility, cloud, and IT-as-a-service to help you unlock the potential of these emerging technologies.

We work with you to architect a holistic solution that integrates new technologies with the legacy environment, in line with your IT strategy. As part of any transformation, we identify the required changes to the ICT infrastructure – from network, communications, and security to the data centre, end-user computing, applications, and service management – to ensure the new

service delivers the desired return on investment and business outcomes.

As a full life cycle service provider, we will help you implement, integrate, transition, manage and continually improve the solution – across a myriad of operating model options. We bring a disciplined, systematic approach using time-tested assessments, methodologies, frameworks, and best practices to drive consistency and quality throughout the project engagement.

If you want to book a consultant or hire one, please call us at +93 (0) 707 255 600 or fill our [contact us](#) form.
